How to Use a Classroom’s Apple TV

Each classroom that has received a digital refresh of its Master Presentation Station’s Instructional Technologies over the last two years has an Apple TV that allows you to teach wirelessly via AirPlay Mirroring. In order to use this feature of the MPS you will need a personal iOS device such as an iPhone, iPad, iPad Mini, or MacBook. (iPhone 4s or later, iPad 2 or later, iPod touch 5th generation or later)

The simplest way to learn if the classroom in which you are teaching has this capability is to look at the Crestron room control touch panel and see if it has an Apple TV button option.

After confirming that the classroom you are in has an Apple TV, follow these steps to share your device’s screen via the classroom’s presentation monitor on the instructional wall:
Step One – Select Apple TV on the Crestron room control touch panel.

Step Two - From the main menu of your iOS device (iPad, MacBook, iPhone), place your finger between the two app icons in the center of the home row and swipe upwards to access the hidden menu.

Step Three - In the upper area of the hidden menu you will see icons for “Airplane Mode,” “WiFi,” “Bluetooth,” “Do Not Disturb,” and “Portrait Lock”. Make certain that Bluetooth is turned on, you can do this by pressing the Bluetooth icon until it turns white.
**Step Four** - Towards the bottom of the hidden menu you will see a menu option for AirPlay, this will only appear if an Apple TV is available to sync to your device. When you see the AirPlay menu option, press on it to access the AirPlay control menu.

**Step Five** - The AirPlay control menu will give you a list of all the Apple TV’s that you are able to connect to at the moment. All TCC Apple TV’s are designated by the room number of the classroom in which they are installed; simply press on the room number in which you are teaching.

**Step Six** - A unique access code will appear on the monitor at the front of the classroom and your iOS device will ask you for a password, enter the access code you see on the monitor into your iOS device in order to connect to the Apple TV.
Step Seven - Once you are connected the AirPlay control menu will display the word “Mirroring” below the Apple TV you are connected to. Next to the word Mirroring is a slider button, slide it to the right to display your iOS device on the monitor at the front of your classroom.
