Crestron TPS-6 Touch Panel LTS Quick-Start guide

This document provides quick-start instruction on how to use the set-top Crestron touch panel connected to the LTS lectern in many classrooms. If this touch panel is not the one utilized in your classroom, you can find a quick-start guide for your touch panel under TCC Training Documents at:

http://www.tcc.edu/faculty/av/training.htm

When you enter a classroom you will see the touch panel sitting on top of the LTS lectern with either a black screen or the TCC logo page. If at a black screen press anywhere on the touch panels screen to bring up the TCC logo.

Once you have the TCC logo screen displaying, press anywhere within the logo and your unit will power on the display device (either a projector or a display monitor.)

On the left hand side of the screen are the buttons for the selection of display sources, these buttons are labeled: “Computer” “Aux Inputs” “Doc Cam” “DVD” and “VCR.” Press the button for whichever source you would like to display.

On the right hand side of the screen are buttons for “System” “Video Mute” “Audio Mute” “Volume Up” and “Volume Down.”

When you press the “Aux Inputs” button you are given an option to choose between a laptop, an auxiliary video device, and an auxiliary s-video device. Press the appropriate button for what you would like to display and connect your external device through the cable disconnects provided in the LTS equipment cabinet.
Selecting either the DVD Player or VCR Player source option will display an image from either the VCR or the DVD player and will give you a control page that doubles as the remote control for the DVD/VHS combo unit installed in the lectern. This gives you control to fast forward, rewind, pause and play your video.

The “System” button on the right hand gives you controls to turn the projector on or off, auto-adjust the projector and turn the system itself off.

When you have completed your presentation press “System Off” to power down the projector or display monitor.

After pressing the “System Off” button you will be taken to a page that asks you if you are sure you wish to exit the system, you will be provided a “Yes” or “No” option.

Press “Yes” to power down the system. Once you have pressed this, the projector or display monitor will power off and the touch panel will return you to the TCC Logo page.

The system is now ready to be used by the next class in this room.

If you encounter any problems you can submit a help desk request for the LTS in your classroom through e-mail to helpdesk@tcc.edu
